Education

University of Manitoba

January 2012 – Present

B. Sc. Bachelor of Computer Science, Honours – 3rd Year

- Expected Graduation Date: April 2017
-

Projects

Ostrich Chat

Ongoing

- Currently developing an IRC Client using C++ and the Qt Framework.

Global Twitch Emotes

2014

- Created a browser extension that traverses the current webpage's DOM and parses known text strings into their appropriate digital emoticon.
- Involved script side network handling of XMLHttpRequests and server communication, which included remediating extended failure modes.
- Currently has an install base of over 12,000 devices across major web browsers.

Unofficial Ultimate-Guitar Enhancer

2015

- Developed a comprehensive browser extension that supplemented various features and capabilities of the "Ultimate-Guitar" online discussion board.
- Created and maintained multiple CSS Stylesheets based on feedback, ensuring usability by maintaining style standards and guides.
- Simulated agile development methodologies via requirements gathering through clear and frequent communication with userbase.

Genotify

2015

- Developed a browser extension which provided the user with gene ID mapping based on highlighted text.
 - Automatically retrieved and displayed basic information from the UniProt.org database.
-

Languages

- Proficient: C++, ECMAScript/Javascript, HTML5/CSS3
 - Familiar: Java, Python, C
-

Tools and Environments

- Git Version Control, Sublime Text, Visual Studio, Eclipse, VMware, Notepad++
-
